

EGG HUNT

- You will work in pairs in the hunt.
- Your first egg will be given to you! It contains a problem which you must solve.
- You will go on your "hunt" for the solution to your given problem. When you pick up an egg, open it and check to see if it is your answer. If not, then close the egg back up and leave it.
- Proceed in the "hunt" until you find your answer.
- Once you find the answer to the given problem, you will bring the matching pair of eggs to your assigned bucket and place them inside.
- Next, you will "hunt" for a new problem to solve. If an egg contains an answer, close it back up and leave it.
- Proceed in the "hunt" to find a new problem.
- Once you have a problem, you must solve it and then "hunt" the solution.
- Continue in the above process until there are no eggs left.
- The pair with the most correct pairs will win a prize!

NOTE: You may NEVER have more than two eggs in your possession at any time. When you have found a match, you must place the pair in your bucket.
